

IN THE CLAIMS

Please amend claims 1 and 2 by rewriting them as follows:

Sub B1
--1. (Amended) A communication terminal comprising:
a display unit (14) which displays an original selection screen for selecting at least one of a plurality of options; and
display control means (11) which causes display of options in said display unit by division or scroll to enable selecting an option not currently displayed in said display unit from the options to be selected, and which causes, when an option not currently displayed has been selected, display of a screen associated with said selected option in said display unit and performs a display so as to include said selected option when displaying said original selection screen next.--

2. (Amended) A communication terminal comprising:
a display unit (14) which displays an original selection screen for selecting at least one of a plurality of options; and
display control means (11) which causes display of options in said display unit by division or scroll to enable selecting an option not currently displayed in said display unit from the options to be selected, and which causes, when an option not currently displayed has been selected, display of a screen associated with said selected option in said display unit, and causes display of information indicating said selected option when displaying said original selection screen next.--
